

IN THE SPECIFICATION:

On page 23, amend paragraph [0090] as follows.

FIGs. 14a-b shows a top view of the roller assembly 128, switch ~~138~~ 118 and and activating magnet 134. The roller assembly 128 may include one or more disks 136 disposed on a common shaft 138.

On page 25, amend paragraph [0096] as follows.

In another illustrated embodiment, the activating magnet ~~134~~ 146 may be disposed on a protective cover 144 that covers the entrance 18, as shown in FIG. 2. The switch 118 may be mounted alongside the door 144, so that it is momentarily activated as the door 144 is opened. The circuit 114 may operate substantially as described above.
